FitBuddy Project

Phase 2 – Problem Statement

Problem Statement

Users may need a convenient way to receive fitness-plan guidance that is organized around their individual inputs. FitBuddy is intended as a Generative AI project for producing fitness-plan guidance.

Need for the Project

A conversational AI approach can provide a structured way to generate personalized fitness-plan content from user-provided information.

Scope

This phase defines the problem and scope at a project level. Specific requirements should follow the supplied project reference document.
