FitBuddy Project

Phase 7 – Results and Evaluation

Evaluation

Evaluate FitBuddy based on whether it successfully generates fitness-plan guidance from user-provided information.

Expected Outcome

A working Generative AI application that demonstrates the use of Gemini Models for fitness-plan generation.

Evaluation Points

Functionality, clarity of generated output, consistency of the user flow, and successful completion of the project objective.

Important Note

The supplied PDF identifies the project but does not provide measured performance results.
