FitBuddy Project

Phase 8 – Conclusion and Future Scope

Conclusion

FitBuddy is identified in the supplied project material as an AI Fitness Plan Generator using Gemini Models under the Generative AI with Google track.

Future Scope

Future versions could be expanded according to the detailed project specification, including additional personalization, improved interaction, and broader fitness-plan features where supported by the project requirements.

Final Note

The exact future-scope items should be aligned with the official project reference document linked in the supplied PDF.
